

Stabilized
Ubiquinol
Powder

Kaneka Q30™

Kaneka Q30™ is a 30% Ubiquinol powder offering all the benefits of Ubiquinol in an air stable form.

Ubiquinol is readily oxidized by air. To prevent oxidation it must be protected by a barrier with low oxygen permeability.

Kaneka worked with a leading pharmaceutical encapsulation company to develop a proprietary process based on fluid bed drying technology.

Kaneka Q30™ can be used for capsules and potentially for stick packs, nutrition bars, protein shakes, soft chews, and other solid food types.

A viscosity enhancer like xanthan gum can aid in maintaining Q30's suspension as a dispersion. Kaneka Q30™ can also be dissolved in hot water.

Ingredient List (GRAS)

- Kaneka Ubiquinol®
- Modified food starch (corn)
- Gum acacia
- Sugar spheres (sucrose, starch)
- Ascorbic acid
- Purified water
- Glycerin
- Silicon dioxide

Kaneka Ubiquinol® has been acknowledged by the FDA as a New Dietary Ingredient (NDI) and is self-affirmed GRAS.

Kaneka Q30™ is manufactured in the USA.
